

Securing Your Journey
to the Cloud

Trend Micro™

Worry-Free™ Business Security Services

Simple to manage protection, so you can focus on your business.

You need security that protects your business computers and servers, as well as the data stored in them. Whether your employees are connecting in the office, at home, or on the road, Trend Micro Worry-Free Business Security Services is a cloud-based solution that's designed to meet the needs of businesses with limited resources.

A snap to install and easy to manage, Worry-Free Business Security Services gives you peace of mind so you can focus on what you do best—taking care of your business.

Protection against viruses, dangerous websites, and losing data

With Worry-Free Business Security Services, you don't have to worry about viruses, threats, and dangerous websites. If you have a server, it will also be protected along with your other systems.

Because it's all automatically maintained for you, there's no need to be concerned about updates or cumbersome software patches with Worry-Free Business Security Services. The easy-to-use web-based console lets you monitor and manage your computers from just about anywhere.

Global Neighborhood Watch

You can be confident that your information is safe because Worry-Free Business Security Services is powered by the Trend Micro™ Smart Protection Network™. It's like a global neighborhood watch that detects and blocks the latest threats wherever they emerge, keeping your business protected all the time.

Do you have the time and know-how to manage your own on-premise security server?

If your security isn't continuously updated, you may be vulnerable to infections that can disable your machines or steal your information. Do you have an on-premise security server? If so, do you have the time and resources it takes to configure and maintain it, deploy patches, track policy updates, and stay current on the latest web threats? If you're like most companies, you don't have the time or expertise on staff. We do. There's a simpler choice for your security: Worry-Free Business Security Services.

KEY BENEFITS

- Monitors, updates, and protects all of your computers automatically
- Stops threats before they reach your business
- Protects computers whether in the office or on the road
- Blocks employee access to unwanted websites
- Prevents infections from USB storage devices
- Locks down confidential and financial data
- Easy to set up and manage

“Worry-Free Business Security Services has done a great job of catching the latest threats. Once it's installed, it just works. The combination of advanced security features and reporting capabilities give us—and our customers—peace of mind.”

Per Moeller-Olsen
Founder, Computer Plus One

BENEFITS FOR PROTECTED OFFICES	
Protects your valuable business data and files	You can safeguard your data from threats. Also, you can use a unique feature to specifically lock-down Intuit Quickbooks® files and folders.
Protects you from threats that come from USB devices or Wi-Fi connections	Your employees are protected from viruses carried on USB devices, and from hackers that attack when your computers log on via wireless networks.
Provides global neighborhood watch	Trend Micro Smart Protection Network has more than 70 million threat sensors worldwide identifying and blocking new Internet threats.
Easy to set up	Just register, login, connect to protect—and you're secured. Register online and receive instant access to the service. Then, simply connect each machine.
Easily manage and monitor security	Centrally manage your desktops, laptops, and servers from anywhere. Get quick overviews and alerts to identify high-risk areas and schedule reports.
Always up-to-date threat prevention	The Smart Protect Network™, a firewall, and advanced behavior-based protection ensure your computers are never unprotected.
Won't slow your computers down	The service connects to our Smart Protection Network and processing occurs in our datacenters so antivirus defense won't slow down your machines.
Restrict access to the Internet	To improve productivity, you can filter out websites to ensure only appropriate sites are visited by employees at times you deem appropriate.
Protect your investment	Prevents employees from tampering with the security.
